

MATH HOMEWORK RUBRIC

Math homework is graded out of 10 points based on completeness and correctness: 5 points for completed homework and 5 points for correct answers as specified below. If an assignment is handed in late, 2 points will automatically be deducted when it is turned in. 1 point will be deducted if homework is done in anything other than pencil. I will only accept assignments up to ONE WEEK after the due date. Anything handed in after that will result in a 0 for a grade and may not be made up after the week has passed.

**Absent students should see date specified on "While You Were Out" sheet for the last day I would accept assignments as late (one week after specified due date).

POINTS POSSIBLE	COMPLETENESS	CORRECTNESS
5-Exemplary	All problems have been attempted with appropriate work shown. Work is neat and organized with all problems numbered and answers circled.	5 out of 5 of the random problems that I check for correctness: process of solving is complete and well explained (through work and/or words) and answer is correct.
4-Proficient	85% of problems have been attempted with appropriate work shown. Work is neat and organized with all problems numbered and answers circled.	4 out of 5 of the random problems that I check for correctness: process of solving is complete and well explained (through work and/or words) and answer is correct.
3-Okay	75% of problems have been attempted with appropriate work shown. Work is not neat and organized and problems are not properly numbered with answers circled.	3 out of 5 of the random problems that I check for correctness: process of solving is complete and well explained (through work and/or words) and answer is correct.
2-Needs Improvement	50% of problems have been attempted with some work shown. Work is unorganized and hard to read. Answers are difficult to find.	2 out of 5 of the random problems that I check for correctness: process of solving is complete and well explained (through work and/or words) and answer is correct.
1-Unsatisfactory	Some problems have been attempted but there is no work to prove answers.	1 out of 5 of the random problems that I check for correctness: process of solving is complete and well explained (through work and/or words) and answer is correct.
0-Unacceptable	Homework was not handed in.	0 out of 5 of the random problems that I check for correctness: process of solving is complete and well explained (through work and/or words) and answer is correct.
