Academy of Health Professions *

This program provides students with project and problem-based learning, clinical and internship experiences, and classroom and lab instruction related to the field of healthcare. Students are introduced to healthcare knowledge and skills through two foundation courses: Foundations of Medicine and Health Science and Structure and Functions of the Human Body. Students may then choose from several course combinations to complete the four-course sequence. Students may participate in a supervised clinical experience course, have the opportunity to design and participate in an internship, and/or enroll in a pre-requisite course at the local community college. Depending upon location, students may have the opportunity to apply what they are learning to real-life healthcare situations in a medical specialty course, such as Certified Nursing Assistant and Pharmacy Technician. Students may earn state and/or nationally recognized credentials after passing licensure examinations. Course offerings, internship opportunities and articulated college credit may vary at program locations.

*Articulated college credit may be earned from the Community College of Baltimore County.
‡ Students may earn a minimum of four MSDE Career & Technical Education (CTE) credits for graduation.

Eastern Technical High School
1100 Mace Avenue
Baltimore, Maryland 21221
