Environmental Science / Environmental Studies

This program offers opportunities for science-oriented and environmentally-motivated students to participate in authentic situations as real environmental scientists. Students experience field study, discuss and take action on environmental issues, learn about the environment from the perspectives of history, law, and public policy, and strive to understand the balance between environment, politics, economics, and culture. Students are encouraged, and possibly required, to pursue Gifted & Talented, Advanced Placement, and college articulated course work. Research and internship opportunities may also be available.

- available at Sparrows Point Education Center in Environmental Studies (SPECIES) and Western School of Technology and Environmental Science (WSTES)

Sparrows Point Education Center in Environmental Studies (SPECIES)
