

The courses listed by content and program below will not be offered in the Virtual Learning Program (VLP) due to equipment, facilities, and curricular requirements. Additionally, individual student course requests may not be offered due to low enrollment or staffing considerations. In that case, BCPS staff will contact students and families throughout the summer to make schedule adjustments as needed.

- Magnet programs and courses at the elementary, middle, and high school levels will not be offered through the VLP. Students currently enrolled in a magnet program may choose to enroll in the VLP and will retain their magnet seat for the 2022-2023 school year should they decide to return for face-to-face instruction.
- CTE programs of study are not available, except for College-Career Research Development (CCRD). Foundations of Engineering, Foundations of Computer Science, and AP Computer Science Principles will be offered to allow students enrolled in the VLP to earn credit required for graduation.

Elementary School courses NOT offered in the Virtual Learning Program

Middle School courses NOT offered in the Virtual Learning Program

High School Courses NOT offered in the Virtual Learning Program
