October 19, 2022

Dear Parents:

It is with great excitement that Baltimore County Public Schools (BCPS) announces the construction and opening of a new Northeast middle school located on King Avenue (anticipated opening September 2024), and a renovation and expansion of Pine Grove Middle School (anticipated completion December 2024). These two projects will relieve overcrowding at middle schools in the Central and Northeast regions.

**Schools participating in the boundary study include Cockeysville, Dumbarton, Golden Ring, Loch Raven Academy, Middle River, Parkville, Perry Hall, Pine Grove, Ridgely, and Stemmers Run middle schools.**

The boundary study committee will be identified this fall and will convene in January 2023. Between January and March, the group will meet seven times, including hosting two public information meetings in March to share the group’s work, speak with community members, and gather information. In May 2023, the Board of Education will consider and take action on the committee’s recommendation, including holding a public hearing.

**How can I get involved in the boundary study process?**

- Complete the [Committee Member Interest Form](#) no later than November 11, 2022, to express your interest in serving on the boundary study committee. **Participation is limited; schools may not be able to accommodate all requests.**
- Committee members are asked to commit to serving the interests of all students and schools involved.
- Starting in January, watch boundary study committee meetings online (live and recorded).
- Attend and observe boundary study committee meetings (meetings are open to the public; but participating in committee activities is limited to committee members).
- Attend the public information sessions in March to review the committee’s draft recommendations and talk with staff and committee members about boundary change considerations.
- Participate in the online survey beginning in March to provide input on the committee’s draft recommendations.
- Attend Board of Education meetings and participate in general public comment.
- E-mail the Board of Education and the boundary study committee to offer input.
- Attend the Board of Education’s public hearing specific to the boundary change decision (in May 2023).

*Raising the bar, Closing gaps, Preparing for our future*
Who serves on the boundary study committee and what is their role?

- The boundary study committee is appointed by the Superintendent with input and recommendations from the Chief of Schools, executive directors, and school principals. The committee has equal representation from all involved schools and is limited in size to one teacher and two representatives (parents and/or others from the school community) from each school. Principals serve as nonvoting members and provide information to support the process.
- Committee members are asked to focus on the interests of all children that will be affected by the boundary process and to resist representing their personal interests.
- Members commit to attending seven meetings. They spend time in and outside of meetings carefully considering information and providing relevant insight about the community.
- Members attend the community public information session to help explain the committee’s work and engage in conversations about boundary change considerations.

Parents or teachers interested in participating on the committee should:

- Have interest in reviewing highly detailed information.
- Be certain of their ability to commit to all meetings.
- Demonstrate their care for our students across the region – and not simply advocate for their own community or family.

This information, along with Frequently Asked Questions (FAQs), is posted on the BCPS Web site under the “Resources” section (https://www.bcps.org/). This site will be updated throughout the boundary change process with new information, so please refer to it often.

To express your interest in participating on the Boundary Study Committee, please complete the Committee Member Interest Form no later than November 11, 2022. Please remember, BCPS provides many ways to stay informed and to advocate for specific concerns as part of the overall process.

Thank you so much for sharing the school year with us.

Sincerely,

Dr. Michael Zarchin
Chief of Schools
Department of Schools

Mr. Pradeep “Pete” Dixit
Executive Director
Department of Facilities Management and Strategic Planning
